

LANCE VINCENT O. ATENDIDO

Software Developer | Game Systems, Backend & Web Applications

Santa Rosa City, Laguna, Philippines | 09185464648 | lanceatendido34@gmail.com
github.com/BirdBrain34 | linkedin.com/in/lance-atendido-769516401 | birdbrain34.github.io

PROFESSIONAL SUMMARY

Junior Developer with a BS in Information Technology (all coursework completed, graduating in 2026). A professional internship at PurpleBug Inc. and five independent projects provided hands-on experience in the development of web applications, backend infrastructure, and AR game features. Comfortable working across the stack and eager to join a team.

EDUCATION

Mapúa Malayan Colleges Laguna (MMCL)
Bachelor of Science in Information Technology

- All academic units completed (0 units remaining); awaiting official graduation
- Dean's Lister — 1st Term, 1st to 3rd Year

Expected Graduation: 2026

EXPERIENCE

AR Game Developer Intern — PurpleBug Inc.
Core Engine: Effect House (TikTok AR Platform)

- Refactored and optimized existing AR karaoke filters — cleaned up the visual-scripting logic behind real-time lyric highlighting and text tracking, and added a win-animation sequence that plays when a song finishes.
- Developed a real-time scoring system that combines pitch detection with timing-window checks to score live vocal input. Cut memory overhead using custom object pooling, and simulated rhythm-synced motion outside the engine's normal physics.
- Designed a gamified AR catching game from scratch — building out the core game loop, face-tracking triggers, a live scoring system, and a combo-streak mechanic with matching visual and audio feedback.

Tech: Effect House, Visual Scripting, Audio DSP, Object Pooling, Face Tracking, Game Loop Design, Performance Optimization

OJT / Internship

TECHNICAL SKILLS

Programming Languages: Python, Java, C#, C++, PHP, Dart, HTML, JavaScript, CSS

Game Development: Effect House (TikTok AR / Visual Scripting), Game Loop Architecture, Object Pooling, Face & Body Tracking, Real-Time Audio DSP, Performance Optimization

Software & Backend Development: REST API Design & Integration, CRUD Operations, Client-Server Architecture, Authentication & Encryption, JSON

Web Development: React, Node.js, HTML5, CSS3, JavaScript (ES6+), Responsive UI Development

Database Design & Management: MySQL, Oracle SQL, Schema Design & Normalization, Foreign Keys & Constraints, Triggers, Stored Procedures

Tools & DevOps: Docker, Kubernetes, Git, GitHub, Visual Studio, VS Code, XAMPP, Flutter

PROJECTS

SapPIIre — Secured Autofill System
Dart, Flutter, HTML, MySQL

- Set up the backend for a mobile system that uses QR codes to securely capture, store, and send user PII to web forms.
- Programmed encrypted authentication and designed a normalized relational database schema to keep sensitive PII protected.

CCIS House Attendance Tracker
HTML, JavaScript, CSS, React, Node.js, Oracle SQL

Ongoing

Aug 2024

- Created a full-stack web app for managing CCIS student records, with CRUD operations for attendance and a live chart showing population by house.

PokedexCards

Jul 2024

C#, PHP, XAMPP

- Built a mobile app that syncs a user's Pokémon card collection through REST API calls, with filtering by rarity and set, plus search.

Personify (Twitter Clone API)

Feb 2024

HTML, JavaScript, CSS, Node.js, REST API, JSON

- Implemented the REST API layer for a Twitter-style social app — handling sign-up, login, posting, liking, and following — and worked with a team on GitHub using a shared version-control workflow.

DiceHard

Jan 2024

C#

- Coded a dice-based roguelike game with custom player and enemy stat systems, skill mechanics, and the core gameplay loop.

ACHIEVEMENTS AND CERTIFICATIONS

Honors

- Hackathon 1st Place — ConnectMe, Mapúa Malayan Colleges Laguna
- Dean's Lister — 1st Term, 1st to 3rd Year, MMCL

Certifications

- TOEIC — Score: 805/990
- CCNA: Introduction to Networks — Cisco Networking Academy
- Ethical Hacking Certification
- CompTIA Tech+ Series
- Python Programming — CodeChum
- Google Cloud Skill Boost — Infrastructure, Security, Data, Machine Learning, App Development
- Blockchain Fundamentals — Certificate of Participation

Recent Coursework (2026)

- Object-Oriented Programming in Python — Duke University (Coursera)
- Introduction to Docker — Google Cloud (Coursera)
- Hello Node Kubernetes — Google Cloud (Coursera)
- APIs in Node.js: Write a RESTful API Backend Application — Coursera
- APIs in Java: Call and Integrate an API — Coursera
